

WE OPEN THE WAY

www.colascanada.ca

Colas is a world leader in the construction and maintenance of roads, transport infrastructure and urban development. Our Canadian origins go back to the early sixties.

Today, we operate more than 120 business units in various communities across Canada.

Core business includes construction, maintenance, rehabilitation of roads, highways, runways, ports, logistics hubs and urban developments. Our various teams can deliver these projects in Traditional, Design Build and P3 mode.

Beyond these services, our construction business is vertically integrated with upstream activities involving the production, trading and recycling of construction materials (aggregates, emulsions and binders, asphalt mixes and bitumen).

We are looking for progressive men and women to join our local teams and operate our dynamic network of companies. We share the same corporate culture and values centred around safety, entrepreneurship, mobility, rigorous risk management, ethics and responsible development.

As part of an ever-evolving industry, research & development has always been a strategic priority. As a group, we continue to focus on environmental protection issues, reduction of our energy footprint and improvement of our quality and operating processes.

Colas Canada companies aim to be a reference and preference to their customers, employees and stakeholders.
